

First Steps in the cloud

CLOUD ADOPTION

Cloud Foundation

Getting started in the cloud is a fundamental process to drive the growth of your business, so we have designed a cloud program with called “**First steps in the cloud**”, that will help you have a **road map** with results in 4 weeks to achieve solid cloud adoption , applying a solid governance based on the **Well Architected Framework**.

- Savings that add up, paying only what is needed
- Defining roles and access levels
- Building templates and blueprints for standardized provisioning of new environments.
- Setting up rules and alerts to prevent provisioning that violates your policies.

Without a clear government model...

70% of companies with cloud services face unnecessary cost overruns

60% of security breaches are the result of human error.

We can help you. Would you like to talk to a specialist?
sales@cloudfgenia.com

Why should you start this program?

- Greater **visibility and control** over your cloud environments.
- Rapid adoption of **new technologies**.
- Improved **performance and operational agility**.
- Pay only for the **capacity you use**.
- **Removes** physical constraints on scalability and reduces financial constraints.

Why migrate with Cloudfgenia?

- We provide you with a **team highly specialized** in platforms and strategies to help you effectively manage your workloads.
- We combine **knowledge and experience**, which has led us to be advanced level and **to become certified** in the Well Architected Framework.
- Combined with our **dominance in the LATAM market**.

Some of Our Certifications

Migration results
First steps in the cloud

90% Achieve cost reductions in the first 3 months

80% Substantially improve the availability of your applications.

98% Identify and address security vulnerabilities in a timely manner.

Our process

1

Objectives and alignment

To get started, a series of meetings will be held with your team to learn how the cloud and governance environments are (or will be) at this time.

2

Implementation and configuration

We start by integrating AWS Control Tower so that together we can define a strategy that responds to your objectives and the characteristics of the appropriate environment.

3

Control systems and alerts

We develop a control system to measure the progress and results of your cloud environment, optimizing the management of your workloads.

4

Policy compliance.

At the end of the process, the team is trained to read the dashboards generated for the monitoring and control of each account.

Benefits of migrating with Cloudfgenia

- You only pay for what you use; we will help you optimize your costs.
- You will have a transparent pricing structure.
- Implementation under the best security practices to protect your data and applications in the cloud.
- Less downtime.
- Encryption of data in transit and at rest for maximum protection.
- Increased productivity of your IT teams.
